The WAYSIDE GARDENS CO. MENTOR, OHIO

Wholesale Trade List Hardy Perennial Plants

WAYSIDE GARDENS

Mentor, Ohio

Twenty-five miles east of Cleveland, on the Cleveland-Painesville Road, at Stop 67, C. P. & E. Electric Line
Telephone, Mentor 39-K.

READ CAREFULLY

All of the stock offered is grown on our grounds, that grown from cuttings and divisions we know to be clean and true. Plants grown from seeds are from seed stocks obtained from the most reliable sources. Seeds, however, don't always come true to color of some kinds of plants.

OUR PLANTS ARE ALL FIELD GROWN, ARE GIVEN CONSTANT CARE AND CULTIVATION AND WHEN SENT OUT ARE STRONG AND WELL DEVELOPED, MUCH LARGER AND WORTH A GREAT DEAL MORE MONEY THAN POT-GROWN PLANTS.

We do not divide our plants before shipping but send the entire plant as dug. Dividing is only done in rare cases and only then because it is necessary to get the best results.

If, after receiving, you are not satisfied with the quality of the stock, let us know and we will replace anything you mention without charge or without question.

TERMS OF PAYMENT

Our terms of payment are cash on delivery, which does not mean that we ship C. O D. We deliver the goods and mail bills at the same time, and expect payment within a few days. People unknown to us will please send cash or references with their order. It is impossible for us to make immediate shipment to new clients who do not send references or cheque with their order. Not sending references or enclosing cheque causes delay in the forwarding of the stock you order.

GUARANTEES

We guarantee all stock furnished by us to be first-class, true to name, and larger than pot-grown plants, all of a size so as to give immediate results.

However, there are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond our control.

QUANTITIES ORDERED

We do not sell less than three plants of a kind unless offered otherwise; twenty-five plants are sold at hundred rate. Five hundred at thousand rate.

RISK

All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

SHIPPING DIRECTIONS

Please give explicit shipping directions, stating whether stock is to be shipped by freight or express, and by what route.

Small shipments can be sent by parcel post. All such shipments will be sent insured, insurance and postage to be paid by the customer.

Largest Growers of Hardy Plants in America

Old Fashioned Hardy Perennials and Their Care

To maintain a really successful hardy border, the stronggrowing kinds of spreading habit should be taken up and divided as often as necessary. As an instance, the deep crimson and glowing scarlet Phloxes will, if left undivided a number of years, revert to the objectionable magenta and lavender hues so often found in neglected gardens. Phlox, Boltonia, Hardy Asters, Achillea, Artemisia, Rudbeckia, Spireas and species of similar habit should be divided every second year and replanted in enriched soil; Japanese and German Iris, Oriental Poppies, Shasta Daisies, Hemerocallis, Delphiniums, Funkia, Chrysanthemums, Veronicas, and so on, every third year; and the smaller-growing kinds as often as their condition requires it.

It will be found that the majority of early-flowering perennials produce their new growth from a compact crown and can, therefore, remain several seasons without dividing. The more rugged-growing varieties flowering in fall produce each season numerous side growths from the old crown which dies away. A strong side growth, if carefully transplanted, will produce larger and finer flowers and a better plant than the entire clump.

Borders of a more permanent nature can be obtained by confining the varieties to non-spreading subjects such as Peonies, Dictamnus, Japanese Anemones, Columbines, Platycodon, Bleeding-Heart, Heuchera, Statice, Stokesia, Primula, Gypsophila, Hardy Lilies, and Darwin Tulips.

HOW TO PLANT. In the preparation of the border, the soil should be dug to a depth of 18 inches—more if it is practicable—and the soil well pulverized and enriched with well-decomposed stable manure, to which a good sprinkling of coarse bone meal might be added. The preparation should be completed some time before the arrival of the plants, permitting the soil to become somewhat settled.

With the plants on hand, the surface can be loosened up with a rake and the plants spaced out properly before any planting is attempted. The actual arrangement of the groups must, of course, be a matter of personal taste, but the matter of height should be kept in mind. Keep the tall-growing kinds in the rear or background, tapering the planting down to the foreground with the dwarfer kinds,

avoiding a stiff, unnatural arrangement by departing from this rule, permitting an occasional plant or group to stand clear of its neighbors. The Aquilegia makes an excellent plant for this purpose.

WHAT TO PLANT. The selection of varieties to plant will depend largely on their location. If a single group or bed is desired, it will be better to make the planting individual in character and plant only one kind—Sweet William, Canterbury Bells, Hollyhocks, Delphinium, or whatever seems appropriate. If an old-fashioned mixed border planting is desired, the most satisfactory arrangement would be to group several plants of a kind together, making the groups in proportion to the border. Select varieties that will flower at various seasons, rendering the border attractive and interesting throughout the season.

The combination of two or more kinds in a group is sometimes desirable. Late-flowering Lilies may be planted among Oriental Poppies, the foliage of which disappears during midsummer, while early-flowering Madonna Lilies can be interspersed among English Delphiniums and Aquilegias with splendid results. The successful combination of varieties not only greatly enhances the never-ending beauties of the hardy border, but adds a creative interest and joy to the enthusiastic planter.

CARE OF THE BORDER. During the spring months, the border should be cultivated frequently to dispose of the weeds and provide the best possible growing conditions. The old flower stems should be cut down from time to time, not only as a matter of appearance, but to induce an additional crop of flowers on those that are disposed to flower again—the Delphinium, for instance. Taller-growing kinds which flower in late summer and fall should be staked by the time the flower heads appear, or they will become straggly on opening and the stems are liable to break off. WINTER PROTECTION. A covering of straw, hay, dry leaves, or any light material, if applied in November after the frost has penetrated an inch or two, will afford ample protection. Heavy covering with green manure should be avoided or smothering will result.

Select Hardy Perennial Plants

Sold out

Sold out

All Plants are forwarded on receipt of order unless instructed to the contrary, and are sent by Express, purchaser paying charges. We can forward plants by Parcel Post, and if wanted sent in this way add 10 per cent to value of order for postage to points east of the Mississippi River, and 20 per cent to points west of the Mississippi River. Six plants of a kind at dozen rate. 25 of a kind sold at 100 rate; 500 at 1000 rate. Not less than 3 of a kind sold unless offered otherwise.

ACHILLEA - Milfoil, or Yarrow

Plants suitable for dry, sunny places. The dwarf kinds are useful for carpeting or for rockeries, the taller varieties as border plants.

Eupatorium (syn. Filipendulina). 3 to 4 feet. Flat heads of brilliant yellow flowers; finely cut foliage. Blooms Millefolium roseum (Rosy Milfoil). July to October. Rosy pink flowers in dense heads on start to Effective on edge of shrubbery or in border
Perry's White. 1 to 2 feet. June to September. A choice 9.00 new variety; pure white flowers over one inch across; broad, overlapping petals. Nothing better for cutting. 1.50 Ptarmica, The Pearl. Pure white, double flowers all sum-10.00 -Boule de Neige. New. An improvement on "The Pearl," with fuller and more perfect do mer. Prized for cutting 10.00 with fuller and more perfect flowers. Best for borders.. 1.50 9.00 9.00

ACONITUM - Monkshood

Summer and late autumn-flowering plants with bold spikes of hoodshaped flowers, thriving in either sun or shade. The roots are poisonous and should not be planted where the tubers might be mistaken for vegetables.

Fischeri. A dwarf variety with pale blue flowers. 18 in.\$3.00 \$20.00 Napellus. (True Monkshood.) 3 to 4 feet. July to August. Large dark blue flowers in a raceme Sold out

wariety has variegated blue and white flowers, Sold out very effective

Wilsoni. 5 to 6 feet. September. A recent intro-duction from Northern China; strong, stately habit with light violet-blue flowers

ACORUS - Sweet Flag

Acorus Calamus. 2 feet. June and early July. Leaves sword shape, erect, flowers inconspicuous. Root stock pungent, aromatic. Thrives best in moist soil, and may be grown in shallow water or dry land\$1.75 \$12.00

Anchusa Italica. See page 3.

ACTAEA - Baneberry

100 Actaea alba. 21/2 feet. September. A very much improved form, having long spikes of clear white flowers. Good for cutting; effective border plant\$2.50

AGROSTEMMA - Rose Campion

Stout, erect-growing plants with silvery foliage, which contrasts well with the showy flowers, which are produced during June and July.

\$8.00

AJUGA - Bugleweed

A useful plant for the rockery and for carpeting the ground, particularly in shady positions, as under trees where grass will not grow; flowers in May and June.

Genevensis. Grows 6 to 8 inches high; dense spikes of blue flowers\$2.00 \$15.00 Reptans rubra. Grows 3 to 4 inches high,

with deep purplish blue flowers 1.75 12.00 ALYSSUM - Rock Madwort

Very popular for beds, borders and winter flowering. of easiest culture and very free blooming. Seed may be sown very early in the spring and up to June 15th, also in the fall for early spring blooming.

Saxatile compactum. Broad masses of bright yellow flowers in early spring.

Anemone Japonica Alba.

AMSONIA

Salicifolia. licifolia. 1½ to 2½ feet. Doz. Late May and early June. Shrubby habit; holds its leaves late. Light blue flow-

res with white throat\$2.00 \$20.00

Tabernaemontana. 2 to 3 feet.

Late May and early June.

Small and numerous flowers of light blue in panicles. Smooth foliages and the same of the age resembling the olive. For the hardy border or planted among shrubbery 3.00

20.00

ANCHUSA - Alkanet

For producing a mass effect of brilliant blue, the Anchusas cannot be surpassed. Dropniore, the darkest one, is most effective. Opal has larger flowers and is the best of the tall varieties, producing a solid sheet of soft turquoise blue. They should be treated as biennials, as the old plants exhaust themselves at the end of two or three years. They reproduce themselves, however, from self-sown seed. The blooming season can be extended for several weeks by cutting the spikes as soon as the flowers fade, thus preventing seeding. Doz.

Dropmore. Tall spikes of beautiful blue flowers, flowering all summer.

Rough, broad foliage. 4 to 5 ft...\$1.50 **Opal.** Very beautiful variety, with \$10.00 large pale blue flowers. 3 to 4 ft... 1.50 10.00

MYOSOTIDIFLORA. A distinct. dwarf perennial variety from Russia, with clusters of charming blue flowers resembling forget-menots. An effective rock-plant for shady places. 1 foot 5.00

40.00

Tinctoria. Handsome, Doz. finely cut foliage, and large, golden yellow flowers produced all summer. Succeeds in the poorest soil\$1.40 \$9.00

ANTHEMIS - Marguerite

Anthemis.

ARABIS - Rock Cress

Alpina. Pure white flowers produced in dense masses, Doz. 100 splendid for border work and last quite some time when cut\$1.50 \$10.00

ARENARIA

ontana. A hardy perennial growing in close tufts profusely covered with small silvery white flowers Montana. which appear quite early in the season. Excellent as an edging plant in formal gardens. Suitable for rockeries in sunny places. Flowers resemble small

Arabis Alpina - Rock Cress.

Anemone - Windflower Hupehensis. Was originally intro- Doz. duced from central China, is closely 100 allied to Anemone japonica which in a miniature form it resemples. The plant grows from 10 to 12 ins. high and from early in August until late in autumn, produces an abundance of flowers about 11/2 inches in diameter, of a pleasing from 9 to 12 inches high and produces violet or purple flowers during April and May. An interesting plant for the rockery or well-drained border 15.00 Pulsatilla rubra. Of dwarf habit with reddish purple flowers 2.50 15.00 Pennsylvanica. A native variety with single, pure white flowers, on stems 12 to 18 inches high. Moist soil in 15.00 ner of rock garden or border. Large white blossoms on nodding stems of about 12 inches. Very free blooming. May and June 3.00 20.00 ANEMONE JAPONICA Valuable plant suitable for edging, massing or Valuable plant suitable for edging, massing or single specimens. They grow rapidly and are profuse in bloom, gaining strength and beauty each year. The blooming period extends from August till mid-November, the large open flowers furnishing abundant cut flowers and a brilliant field display. Cover plants in winter. We offer strong fold-grown roots only the page 100

Aquilegia.

Aquilegia - Columbine

As a cut flower the Long Spurred Aquilegias are the daintiest of our outdoor grown flowers.

They come in blues, whites and yellows, and shades of pink and rose in strains reasonably true.

Practically all the various shades and colors are in the Coerulea Hybrids. They remain in bloom for a long season and are vigorous and long lived.

They are not at all particular as to soil or location, although they prefer a sandy loam and a moist but well drained, sunny position, and usually make themselves at home in any hardy border or rockery. Their period of flowering covers the late spring and early summer months. Taken as a whole, they are a most important part of the hardy garden, and should be grown in quantity by every lover of old-fashioned garden flowers.

| snowy white flowers. A fine-scented herb | 0 25.00 |

Armeria.

New Hardy Asters

NEW JAPANESE HARDY ASTER Distinct species which has attracted much attention by its unique habit of growth, its floriferousness and lateness in flowering. It forms a circular cushion-like plant 2½ feet across, the center of the plant rarely exceeding 9 inches in height, gradually tapering to 3 or 4 inches at the outside; the flowers, of delicate mauve, with silvery white reflection, measure over 1½ inches in diameter, and are produced in such lavish profusion as to completely cover the plant; the blooms are at their best in November 1.75

Hardy Asters

Michaelmas Daisies, or Starworts

The many species, widely distinct from each other in habit and form, are, with a few exceptions, all native of North America. It is in Europe, however, that our Asters have been most highly appreciated. Many improvements have been made by European growers, and many hybrid forms have been produced by crossing the different species.

Culture. All are of the easiest cultivation, succeeding in almost any soil or situation. Amellus, Ericoides, and Novae-Angliae do best in open, sunny, dry situations; while Novi-Belgi may be grown in partial shade in most situations.

For the best results, they require division and replanting every third year.

With few exceptions, these are the single-flowered and must not be confused with the florists' annual, large-

Chrysanthemum Maximum - Shasta Daisy

The improved varieties of Marguerite, all allied to the Ox-eye Daisy that adorns our fields in the spring, are among the most useful of our garden flowers. Not only have these flowers been greatly improved in size and form, but there are now early and late blooming varieties which give a succession of long stemmed flowers so valuable for vase decoration during four months of the year. May Queen is an early variety worthy of attention, and Perfection is robust and free-flowering. Mrs. C. Lowthian Bell has enormous flowers with strong stems. The Shasta Daisy has a small yellow center with long white petals, the slender stems springing from the base of the plant, and is most attractive either in the perennial border or as a cut flower.

Chrysanthemum Maximum—Shasta Daisies, Sutton's Perfection.

(The Arctic Daisy). Among fall-flowering Doz. perennials this is a perfect gem. It forms an attractive rosette-like clump of pretty dark green foliage, and in September multitudes of flower stems appear, terminated by pure white flowers 2 to 21/2 inches in terminated by pure white flowers 2 to 2½ incnes in diameter. These begin to develop during the last week in September, and continue in good condition throughout October, and frequently into November ..\$2.50 \$18.00 Uliginosum (syn. Pyrethrum). Giant Daisy. Grows 3 to 4 feet high, covered with large, white, daisy-like flowers from June to September 15.0 10.00

Hardy Garden Chrysanthemums

The varieties that follow are all perfectly hardy, providing they are grown in a section that is not too wet. If the stock plants are water soaked all winter, or frozen in cakes of ice, they will not survive, but given congenial growing conditions and a slight protection of dry leaves with branches over them to prevent the leaves blowing away, they will come through without any trouble. While the first frost will blast the flowers that are developed at the time, it will not injure the unopened buds.

FULL FIELD-GROWN CLUMPS-NOT DIVISIONS We collected from old gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; are very showy. 3 to 4 feet high. Hardy Garden Chrysanthemums.

Clematis Paniculata

(Japanese Virgins' Bower)

This handsome hardy climber is one of the choicest and most satisfactory climbing flowering plants. Of strong, rapid growth, with small, dense, cheerful green foliage, and pure white, deliciously fragrant flowers, which appear in the greatest profusion in August and September, followed by silvery feathery seed pods, which make an attractive appearance until mid-winter. The plants succeed in almost any position. Not only is it adapted to run up all kinds of supports, but is just as useful for planting among rock-work, on sloping banks, for covering graves, or, in fact, in any position where a graceful vine or trailer is desired.

CONVALLARIA (Lily-of-the-Valley)

Majalis. This popular and fragrant subject repays for being well treated. Strong, imported roots

Daphne - Garland Flower

Handsome dwarf sub-shrubs, mostly evergreen, excellently suited for planting near the front of shrubberies, with odorous pink flowers, and handsome foliage.

Cneorum (Garland Flower). Long procumbent Each branches, and bright, pink, sweetly-scented blossoms; evergreen foliage. Blooms in April and again in September. 1 foot \$1.00 \$11.00

Cypripedium - Hardy Orchids

Hardy Orchids for the most part are shade-loving plants, and delight $l_{\rm h}$ a soil well drained and largely composed of leaf mold. While the common border plants are not particular as to soil, they like the open sun and are exposed to drying winds, but these little Orchids require altogether a different treatment, both in soil and position. We find them in the wild, usually in a soil composed largely of leaf mold; the trees and rocks, the unevenness of the ground, low shrubs and ferns, all help to keep the air and soil cool and moist, and with but little circulation of the air. We add some bog-moss to the leaf mold in making the bed for the smaller Orchids, raising the bed several inches to insure good drainage.

Acaule (Lady Slipper; Moccasin Flower). This is often called the Red Lady Slipper, but the flower is rose-purple in color. The plant sends up two broadish green leaves from the base, and from between them comes a stalk about a foot high bearing a single large, showy flower. Plant in a well drained soil, with some leaf-mold. This does quite well in pots. \$3.00 per doz., \$20.00 per 100.

Parvifiorum (Small Yellow Lady Slipper). This is one of the very best of the hardy Orchids for cultivation, growing about a foot high; stem leafy, bearing at the top one or two very showy yellow flowers; fragrant. It does exceedingly well in a rich, shaded spot where leaf-mold has been added, and should be left undisturbed for several years. It will also thrive in the bog-garden, if not too wet. \$3.00 per doz., \$20.00 per 100.

Pubescens (Large Yellow Lady Slipper). Very much like Parvifiorum, only the flowers are larger. This should be planted in a rich bed in which leaf-mold should be a part, in some moist, yet well drained shady spot. It should grow stronger for several years if left undisturbed. \$3.00 per doz., \$20.00 per 100.

Spectabile (Showy Lady Slipper). The finest and most showy of all our Orchids. It grows about two feet high, bearing along the stalk several rather large, roundish leaves, and on top one or two quite large rose-purple or nearly white flowers. Does exceedingly well in a moist and partly shaded bed of peat or leaf-mold. It is also a good pot plant for the cool greenhouse. \$3.00 per doz., \$20.00 per 100.

Cypripedium.

Delphiniums - Tall English

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. Some varieties grow 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long, in fact, they will bloom from spring till fall.

The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in summer the plants are not too forward, and that they be well watered if the weather be dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. A succession of flowers may be expected from spring to early autumn, especially if the spikes which have done flowering early be cut down to the ground; freesh growth will then be produced which will give blossoms. Watering in summer will increase size of spike and flower. Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf Alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crewns will protect the plants from slugs through the winter and spring. Any garden soil suits the Delphiniums.

NEW PERPETUAL-FLOWERING HARDY PINKS

This is a most important addition to our list of perennial plants. They are perfectly hardy and flower continuously from early spring until late in autumn; the flowers are much more substantial and larger than the old type of Hardy Pinks, and are borne on long stems suitable for cutting; deliciously clove-scented. All good thrifty young plants.

DIANTHUS HEDDEWIGI - Japan Pinks
Flowers are very large and of the most brilliant colors, varying
from pure white to the richest crimson, while many are beautifully
laced or striped. For bedding purposes they are of immense value
during the entire summer, and they also furnish elegant flowers for
bouquets.

Mixed Varieties\$1.50 \$10.00

DIANTHUS - Pinks Various Types

Almost all pinks are of the easiest culture in any well-drained soil and sunny position. Arenarius (Sand-loving Pink). This Pink delights in a sandy soil and sun. Flowers white with carmine ring, deeply fringed and fragrant. Excellent for dry, hot places. 6 inches\$2.00 \$15.00 Caesius grandifiorus (Cheddar Pink). It is very compact in growth and makes a cushion of glaucous leaves from which, in May, spring the sweet-smelling, rosecolored flowers. It varies as much as from four inches to ten inches in height. It is easily grown and very fine for the rock garden. 6 inches 3.00 20.00 Cruentus. Dense heads of flowers on long stems. Deep red. Fine border plant 2.00 15.00 Deltoides (Maiden Pink). and

Gaillardias - New English

We consider the Gaillardia one of the most desirable hardy plants cultivation, and our strain of these brilliant flowered plants to be the finest extant. Though such an ornamental addition to the herbaceous border, the perennial Gaillardia is content with extremely simple treatment. Dig the soil deeply and enrich with well-rotted manure.

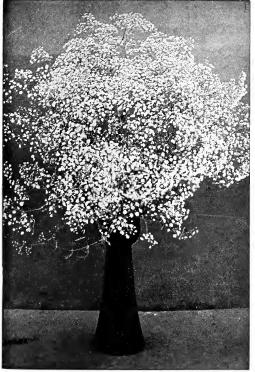

We recommend the Gaillardia for bedding purposes as well as for borders. Everyone will have noticed how grandly Gaillardias have thriven through droughts; they seem hardly to need water. The gay blossoms are obtainable in perpetual profusion from June to November and the greater the drought and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated. No more beautiful and brilliant sight can be imagined than a large bed of Gaillardias, with their profusion of highly colored flowers of all shades. Some of the varieties of our improved strain measure fully 5 inches Doz. in diameter. 100 Mixed Colors

Hardy Ornamental Grasses

The ornamental grasses can be used with telling effect in borders, large beds, or by the margin of ponds and lakes. They are often used

Gypsophila Flore Pleno.

GYPSOPHILA - Baby's Breath

Very branching or spreading slender herbs, with scant foliage when in bloom. Of easiest culture in open, rather dry places. Desirable where a mass of delicate misty bloom will fill in a bare place.

HELIANTHUS - Hardy Sunflower

The perennial Sunflowers should always be planted in masses, where they may have plenty of room, against a background of shrubbery, or naturalized in wild gardens or woodlands. They produce a grand effect impossible to describe. combination with hardy asters, where broad color effects are wanted in late summer, they have few equals. They are profuse bloomers, producing an un-

limited supply of flowers for decoration. Sparcifolius. The best of the summer-blooming varieties of hardy Sunflowers. Flowers 3 inches in diameter and freely produced. Plant grows 3 to 4 feet high, and spreads rapidly. Fine for the \$10.00 taller growth and having larger flowers. A decided improve-10.00 Multiflorus fi. pl. Clear yellow; closely resembling a Dahlia in shape and

Helianthemum.

HELIOPSIS - Hardy Zinnia Similar in general habit to Helianthus, but commencing flower earlier in the season. July and August. Of dwarfer habit, rarely exceeding 3 feet in height. Very valuable for cutting.

Pitcheriana. A desirable variety. The flowers are of a beautiful deep

golden yellow, about two inches in diameter, very Doz. 100 thick texture and a useful cut flower\$1.50 \$10.00

Scabra excelsa. A new variety with very rich chrome yellow flowers, turning to a bright yellow as they mature. These are almost double, having from 4 to 5 rows of petals, and are produced very profusely. The plant is of robust growth, about 3 feet high, and from mid-July to the end of August makes an effective display 2.00

15.00

Helianthus Multiflorus fl. pl.

HELIANTHEMUM - Rock or Sun Rose

Low growing evergreen plants, forming broad clumps, and which during their flowering season, July to September, are hidden by mass of bloom; for the front of the border, the rockery, or a dry sunny bank.

Mutabile. Golden \$1.75 yellow. per doz.; \$12.00 per 100.

Choice Mixed Varieties. \$1.50 per doz.; \$10.00 per 100.

HELENIUM (Sneezewort)

Hand some plants, allied to the sunflowers. Of the easiest

culture, forming dense masses of blooms in late summer and autumn. Autumnale superbum. Broad heads of deep golden-yellow flowers in late summer. Grows 5 to 6 ft. high\$1.75 \$12.00 Autumnale rubrum. A splendid new variety; deep ox-blood red, changing to terra-cotta. 5 to 6 feet. September 1.75 12.00 Bigelowi Quick-growing, branching plants, 2 to 3 feet; quite showy during August with terminal clusters of 1½ inch, deep yellow flowers; brown centered 1.75 Riverton Beauty. Pure lemon yellow, with large disc of purplish black 1.75 12 00 New. Old gold, suffused with bright Riverton Gem. terra-cotta, changing to wallflower-red. August to 12.00 October

HEPATICA - Liver-Leaf

100 A pretty native, spring-flowering plant, with blue flowers; prefers shade, but will do fairly well in an open situation in moist, rich loam\$1.25 \$8.00

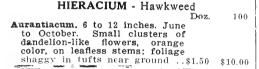

Helenium.

Hemerocallis - Yellow Day Lily

Lemon Lilies, or Hemerocallis flava, have long been favorites in our garden, and are always included in any list of the most popular hardy plants. All of the varicties of Hemerocallis are desirable and beautiful. The tall, graceful, grass-like foliage is very handsome and sets off the charming, lily-like flowers very effectively. They look particularly well naturalized along streams or on moist banks, and will thrive most luxuriantly in partial shade.

Flava (Lemon Lily). Sweet-scented, clear full yellow. 21/2 feet. Flowers in June.. \$1.50 \$10.00 Fulva (Brown Day Lily). Coppery orange. shaded crimson. 3 feet. July 1.75 12.00 Dr. Regel. Handsome, rich orange-yellow flowers in May. Very fragrant. Fine for 10.00 July, a month later, and 6 to 10 inches of the upper portion of the flower scapes are thickened and flattened 1.50 10.00 Florham. A strong grower, 3 to 3½ feet high, large trumpet-shaped flowers; rich, golden yellow, with Indian yellow markings. June and July 2.00 15.00 HESPERIS - Sweet Rocket Matronalis. 2 to 3 feet. June, July. Fra-100 grant purple flowers in showy spikes. Desirable for wild garden, shrubbery or \$9.00 100 spikes of white flowers. Same

height and season as above ..\$1.40

Giant flowering Marshmallow.

Hemerocallis.

100 **HEUCHERA** Loz. Americana. 1½ to 2 feet. July. A native plant with greenish-yellow flowers; foliage mottled. Rock garden\$2.00 \$15.00 Brizoides. and find it one of the most desirable hardy plants introduced in many years. It has the same foliage and habit as Heuchera sanguinea, but the color is not so brilliant, though five or six times as many flowers are 100 produced. Blooms in May Sanguinea. 12 to 18 inches. Doz.

10.00

June to September, Flowers bright crimson; very free-flowering. Nice for cutting. Excellent for

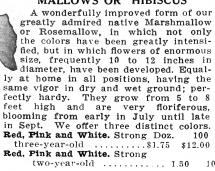

rock garden\$3.00 \$20.00

HIBISCUS - Mallow Mallow Marvels. A robust type of upright habit, producing an aburdance of flowers of enormous size in all the richest shades of crimson, pink and white; mixed colors. 2 year ... 1.50

Moscheutos (Swamp Rosemallow). Flowers 6 inches in diameter. Red or pink. 10.00 2 year 1.50

Moscheutos "Crimson Eye." Flowers of immense size: of the purest white, with a large spot of deep velvety crimson in the center 1.50

NEW GIANT-FLOWERING MARSH-MALLOWS OR HIBISCUS

Heuchera.

Hollyhocks - Althea Rosea

The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect, with elegant camellia-like flowers that form perfect rosettes of the most lovely shades of color. They require a deep, rich soil and a sunny corner, but will repay by their gorgeous and lavish bloom all the attention beginned when their gorgeous and lavish bloom all the attention bestowed upon them.

Painters choose Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common, single Hollyhock is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group of single Hollyhocks, and once planted they will literally take care of themselves, even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be topheavy. Hollyhocks planted in the fall will bloom the following summer.

7.00

65.00

Double. Separate colors, red, maroon, white, yellow, pink, Newport pink, white with purple base, bright rose, dark purple, apple blossom.

pale lilac\$1.30 \$7.00 \$65.00

New Allegheny. Immense semi-double flowers, with fringed edges 1.30

Single. Red. white, pink and mixed 1.30

Our Hollyhocks are free from disease and rust. Clean, strong, 1-year-old stock. 2-year-old plants are never sent out, as they are not satisfactory.

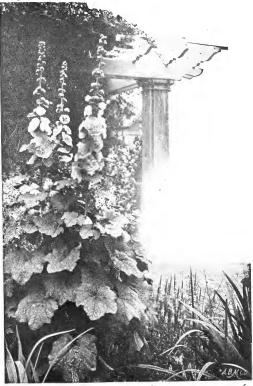

HYACINTHUS CANDICANS

1000 Doz.

Twenty to thirty white, pendent, bell-shaped flowers on stalks 3 to 4 feet high. Blooms early and till late fall\$1.00 \$5.00 \$45.00

Hypericum

Moserianum St. John's Wort.

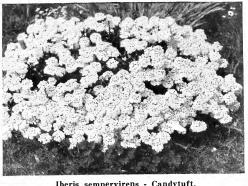

Hollyhocks.

HYPERICUM - St. John's Wort Moserianum. A most desirable bor-der plant, of free and graceful habit, producing long, slender, much branched stems, leafy to the base, and all drooping towards the ends, apparently from the weight of the flowers and buds, although the flowers face so none of their beauty is lost. It is marvelously freeflowering, of large size, measuring from 2 to 21/2 inches in diameter; in color a rich golden yellow, rendered still more effective by the numerous yellow stamens and crimson anthers, and blooms continuously the entire season. 2 feet. \$3.00 per doz.; \$20.00 per 100.

Henryi. The same as Moserianum, though slightly more upright in growth and much hardier and better suited for cold climates. \$4.00 per doz.; \$30.00 per 100.

15.00

100

Iberis sempervirens - Candytuft.

IBERIS - Hardy Candytuft

Most desirable dwarf plants, 8 to 10 inches, with evergreen foliage, which is completely hidden with dense heads of flowers early in the Doz. 100

Sempervirens. Very dwarf and covered with a sheet of white, a particularly fine rock plant.

Jucunda. Dwarf, cerise-pink flowers in June. Glaucous blue foliage. Splendid rock plant; perfectly hardy. 6 inches 2.00

INULA Doz. Golden Beauty. Free-flowering border plants with yellow\$1.50

INCARVILLEA

Large rich rose Bignonia-like flowers with deep yellow throats, produced all through the summer. A hardy perennial which succeeds well in borders and is equally valuable for greenhouse decoration. 160 18 inches.

Delavayi. Flowers produced in large trusses\$3.00 \$20.00

Iris Sibirica.

Various Iris

We offer below some very desirable species and varieties.

IRIS CRISTATA

| Schneecuppe. A large showy pure white | 2.00 | 15.00 |

IRIS SIBIRICA - Siberian Iris

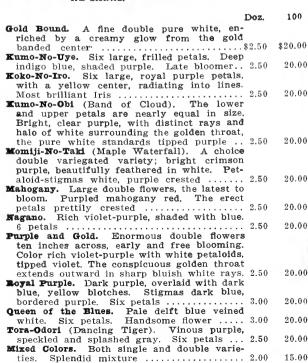

Vigorous, free-flowering varieties of the easiest culture; fine for the flower border, for naturalizing and for water-side planting.

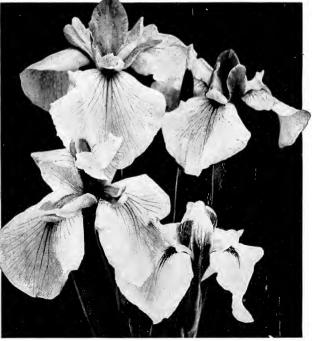

Imperial Japanese Iris - Iris Kaempferi

The magnificent Iris Kaempferi belongs to the Apogons, and a field of them in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

Culture. The secret of success is to keep the ground well stirred, never allowing it to bake or become hard. Any good mellow clay loam will grow Japanese Irises to perfection, if well enriched. They like plenty of moisture during the growing season, but flooding with water is not a necessity, as many suppose. Water standing over the plants for a great length of time in winter is fatal to them.

Time to Plant. Latter part of August to the beginning of October is the best time. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen, to prevent roots from being heaved out of ground by frost. In northern sections late planting had best be deferred until spring

German Iris

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it. It throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Plant in late August or early September.

The roots offered in this list are from plants transplanted a year ago and are of a size large enough to bloom next spring. The collection is up-to-date and consists of the best and newest standard varieties.

Twenty-five roots at 100 rate, 250 roots of a kind at 1000 rate. We guarantee the usual Wayside Gardens quality. Dog

Japanese Lilies

(Delivery Early in Spring.)
We guarantee safe delivery in good condition of all

Auratum (Golden-banded Japan Lily). Undoubtedly one of the finest. Its large, graceful, fragrant flowers are composed of

graceful, fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded with chocolate-crimson spots, and striped through the center a golden yellow; 3 to 5 feet. July to Sept. ..\$3.00 \$22.00

Auratum platyphyllum. Also called "Macranthum." This is a robust growing form; the stem is stouter and attains a greater height; the leaves are much broader; enormous flowers, white, richly spotted yellow. Undoubtedly the choicest of all 5.00

Auratum rubro vittatum. Similar to the above but the flowers are dark rose-pink 6.50

Batemani. Rich apricot. Very handsome. 4.00

Canadense. Our dainty beautiful native lily.
Graceful and charming flowers 1.50 10.00

Davuricum. This beautiful lily comes from the home of L. tenuifolium in Siberia. It resembles a native Philadelphicum. It is of easy culture, grows two or three to five upright scarlet flowers, dotted black 1.75

Giganteum (Easter Lily). 4 to 5 feet. July and August. Most majestic of all the lilies. White, fragrant, funnel-shaped flowers 3.25 25.60

Hansoni. Most desirable, not particular in its cultural requirements and extremely handsome in flower; does well in light loam. Plant among shrubs and low plants to protect young shoots, this being one of the earliest lilies to appear in the spring. The stem reaches a height of 4 to 5 feet, carrying blossoms 2 inches across, regularly reflexed, the petals being of a bright orange spotted more or less with brown, of a waxy texture. Admirable for pot culture. June flowering. 6.50

Lilium Speciosum

Lilium Auratum-Gold-banded Lily.

| Henryi. A new Japanese lily that has made a sensation in Europe. It has the same form and appearance as the Speciosum varieties, but the flowers are bright orange yellow. We grow this variety now ourselves from seed. They are as hardy as a tree. Shipment October 1st to May 1st | Doz. | 100 \$35,00 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| Krameri. Unique for its color and grows from 2 to 4 feet high. The funnel-shaped finely formed flowers are 6 inches or more in length and as much across, of a beautiful clear pink color, often shaded blush | 4.00 | 30.00 |
| Lilium regale, or myrlophyllum (The Regal l.ily). It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most lilles. Blooms out-of-doors early in July. Strong bulbs, flowering size | 5.00 | 35.00 |
| Rubellum. Beautiful small lily. The color varies from a deep rose-pink to almost white, with yellow anthers; very fragrant, small, funnel-shaped flowers; grows 1½ feet high. It does best in light soil | 3,50 | 25,00 |
| Speciosum album. The Speciosum or Lancifolium are the most important of all the Japanese Lilies, always satisfactory. The variety here offered has large white flowers of great substance, with a greenish band running through the center of each petal | 3.00 | 20.00 |
| Speciosum magnificum. Magnificent large flowers of rich deep red. Extra large flowering bulbs | | 22.00 |
| reddish orange, conspicuously spotted | 1.50 | 10.00 |
| Thunbergianum (elegans) sanguineum. Dark crimson. The Thunbergianums are all of the easiest culture and bloom in June | 3.00 | 20.00 |
| Tigrinum flore pleno (The Double Tiger Lily). The only Double Tiger Lily worth growing Tigrinum simplex (The well known Single Tiger Lily). Of easiest culture and worthy | 1.75 | 12.00 |
| of general planting on account of stateliness. | 1.75 | 12.00 |

MONARDA OR BERGAMOT (Oswego Tea) Showy plants growing from 2 to 3 feet high, succeeding in any soil or position, with aromatic foliage, and producing

tion in winter.

Papaver Orientale

These are the regal representatives of this popular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual and biennial kinds, and for a gorgeous display of rich and brilliant coloring nothing equals them during their period of flowering in May and June, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any position. They are of the easiest culture; almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in fall or early spring

\$8.00

15.00

Sold out

before the first of May-give them water occasionally during dry spells in the early part of the season. Mulch with stable litter in fall; and they will increase in size and floriferousness for several years. We offer on this page the best of the latest introductions, as well as the following distinct standard varieties: Doz.

Orientale. Orange-scarlet, sometimes called Bracteatum\$1.25

PAPAVER NUDICAULE - Iceland Poppies

The plant is of neat habit, forming a tuft of bright green fern-like foliage, from which spring throughout the entire season, a profusion of slender leafless stems 1 foot high, each graced with charming cupshaped flowers. Doz. 100 In Mixture \$1.50 \$10.00

Doz. Arundinacea variegata (Variegated

Ribbon Grass). Leaves longitudinally striped with white; very ornamental; sometimes run wild about old places; 18 in, \$1.50 \$10.00

Papaver Nudicaule-Iceland Poppies.

PENNISETUM - Fountain Grass

Japonicum. A beautiful grass Doz. 100 whose flower heads are produced in the greatest profusion. Color rich mahogany, conspicuously tipped with white\$2.50

PENTSTEMON - Beard Tongue

Most useful and showy perennials. Some varieties are not hardy. Those below are perfectly so. June and July. 3 feet.Doz. Barbatus Torreyi. Spikes of bright

scarlet flowers from June till August. A very effective plant for hardy beds\$1.50 \$10.00 Digitalis. White Foxglove-like spikes 1.50 10.00

Pyrethrums -

The Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden. They are perfectly hardy and absolutely invaluable for cut flowers through the summer and autumn months. The flowers are bright and elegantly borne on long stems; most convenient for decoration. In form the double varieties are somewhat aster or chrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be designated Spring Chrysanthemums, possessing the advantage over the Chrysanthemums of being able to withstand the severest winter without protection. The single-flowered varieties are variable colored Marguerites and

possess a range of color and hardiness that Marguerites might envy in vain. Nothing can surpass the Pyrethrum for profusion of flowers, and the blossoms are not injured by storm or sun. Their position should be in the border or in beds. The plants may be cut down after June, which will keep up a greater succession of bloom through autumn. Grow freely in any ordinary garden soil; a good rich loam suits them, perhaps, best and in order to secure size, brilliancy and number of flowers, plenty of ordinary well-rotted manure may be added to well-trenched, well-drained soil, and plenty of water may be given when they are in bud in the dry summer 100 \$8.00

Peony, Festiva Maxima.

Peonies

The varieties we offer are arranged alphabetically, and where known, the name and date of the introducer immediately follows in parenthesis. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally next looks for the character and habit of the plant. To further aid purchasers we shall be pleased to give by letter further information to intending purchasers. 3-5 eyes 3 yr.

pact, rose type bloom; strong, vigorous grower and free bloomer. Midseason. .30 1.00

Avalanche. (Crousse, 1886.) Creamy white, slightly flecked with carmine.

strong growth. Midseason

Couronne d'Or. (Calot, 1873.) White
with yellow tints arising from a few
stamens showing amidst the petals.
Center petals tipped with carmine.
Large, rather full flower of superb
form. Strong grower and very free

Large compact, crown type; fragrant;

bloomer. Good keeper. Late 30

Dorchester. (Richardson, 1870.) Pale pink. Large, compact, rose type; fragrant; medium height; strong, thick stems. Late. Midseason 25

Stems. Late. Midseason

Duchesse de Nemours. (Calot, 1856.)
Guard petals white, center lemon yellow, cup-shaped; at first it develops into a large bloom, gradually fading to white; fragrant; strong grower and free bloomer. Extra good commercial variety. Follows 2 to 3 days later than Festiva Maxima

Stokesia Cyanea.

Thalictrum Aquilegifolium.

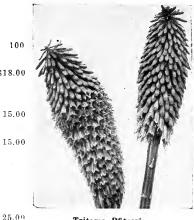

SWEET WILLIAM (See Dianthus Barbatus)

THERMOPSIS Caroliniana. A showy, tall-growing plant, Doz. attaining a height of 3 to 4 feet, pro-100

ducing long spikes of yellow flowers in June and July\$2.50 \$18.00 THALICTRUM - Meadow Rue Aquilegifolium. Graceful foliage like that

of Columbine, and rosy-purple flowers from May to July. 2 to 3 feet 2.00 15.00 Adiantifolium. A beautiful variety, with foliage like the Maidenhair Fern and miniature white flowers in June 2.00 15.00

Dipterocarpum. A pretty and distinct species, with flowers of a charming shade of lilac-mauve, which is brightened by a bunch of lemon-yellow stamens and anthers. The plant is of strong growth, about 4 feet high. The dentry flowers are produced in grove dainty flowers are produced in grace-ful sprays during August and Sept... 3.50

Tritoma Pfitzeri.

THYMUS - Thyme sweet herb; flowers small, lilac or purplish, in terminal, interrupted spikes; foliage very fragrant. Fine for rock garden 1.50 10.00

TIARELLA - Miterwort

Cordifolia. 6 to 12 in. May. An elegant plant with fine foliage and small, creamy white, star-shaped flowers. Prefers partial shade 1.50

10.00

100

each

TUNICA Saxifraga. A pretty tufted plant Doz. with light pink flowers, produced all summer. Useful either for the rockery or the border\$1.50 \$10.00

TRILLIUM - Wood Lily, or Wake Robin Grandiflorum. Excellent plants for shady positions in the 100 hardy border, or in a Doz. sub-aquatic position. Large pure white flowers in early spring. 12 to 18 inches\$1.50

TRADESCANTIA - Spiderwort

100 Virginica. Produces a succession of blue flowers all summer.\$1.50

Virginica alba. A white-flowered form 1.50 TRITOMA - Red-hot Poker, Flame Flower, or Torch Lily

Pfitzeri (The Everblooming Flame Flower). The early, free and continuous blooming qualities of this variety have made it one of the great bedding plants, and when we consider that there are few flowering plants which are suitable for massing under our severe climatic conditions, it is little wonder that such an elegant subject should become so popular. Succeeds in any ordinary garden soil, but responds quickly to liberal treatment. Hardy if given protection, but the most satisfactory method of wintering is to bury the roots in sand in a cool cellar. In bloom from August to October, with spikes 3 to 4 feet high, and heads of bloom of a rich orange-scarlet, producing a grand effect either Doz. planted singly in the border or in masses\$2.00

\$15.00 Bufa. Each plant will produce from 10 to 15 flower-stalks of medium size; flowers are pale orange-yellow, rather small but blooms appear in July and all through the summer until frost 2.00 15.00

Quartiniana. A strong growing, thick stalked variety, blooming late in May with flower cones 10 to 12 inches long. Orange-red at first, but yellow on bottom half as bloom matures. Perfectly hardy here; does not need protection. 3.00 Uvaria grandifiora. 3 to 4 ft. The old-fashioned, late-flowering sort, with flowers rich red changing to salmon-20.00 15.00 pink. Needs slight protection

TROLLIUS - Globe Flower Europaeus Orange Globe. Desirable free-flowering plants, producing their giant bright yellow, buttercup-like blossoms on stems 1 to 2 feet high from May until August; succeed admirably in the border in a half shady position

Trollius.

Veronica Longifolia Subsessilis-Speedwell

VALERIANA - Valerian Showy heads of old-rose Doz. 100 Coccines June to October. 2 ft. ..\$1.50 \$10.00 flowers. Officinalis (Hardy Garden Heliotrope). Produces showy heads of rose-tinted white flowers during June and July, with delicious, strong heliotrope odor. 3 to 4 feet 2.00 15.00

VINCA - Periwinkle, or Trailing Myrtle Minor. A trailing, evergreen plant, Doz. 100 used extensively for carpeting the ground under shrubs or trees or on graves, where it is too shady for grass or other plants to thrive ...\$1.50 \$10.00

YUCCA - Adam's Needle

Among hardy plants Doz. 100 Filamentosa. there is nothing more effective and striking for isolated positions on the lawn or on dry banks where few other plants thrive. It is also indispensable for the rockery. Its broad, sword-like, evergreen foliage and immense branching spikes of drooping, creamy white flowers, rising to a height of 6 feet, render it a bold and handsome subject wherever placed. Should planted in spring. 3-year-old plants ...\$2.00 \$15.00 4-year-old plants ...\$3.00 25.00

Veronica - Speedwell

A family containing some of the most beautiful subjects for the hardy garden and rockery. Given a rich, well-drained soil in an open situation in full sun, they will all thrive in an amazing manner. Amethystina. 8 to 12 inches. June. A slender species, with Doz. short spikes of amethyst-blue flowers\$1.50 \$10.00 Incana. 1 foot. July and August. A white, woolly plant; flowers numerous; blue. Has good appearance, both in and out 10.00 creases in strength and beauty each year. Spikes completely studded with beautiful blue flowers; fine for cutting and one 10.00 10.00 matted deep green foliage, hidden in spring under a cloud of 10.00 Spicata. 18 inches. June and July. Long spikes of violet-blue 10.00 20.00 -rosea. 2 feet. June to September. Much-branched variety with pink flowers 15.00 Virginica (Great Virginian Speedwell). A free-growing perennial 15.00 VERBASCUM - Mullein 100 Olympicum (Greek Mullein). The showiest of the entire family of more than thirty varieties. The foliage is silvery white, with leaves often 3 feet long. The flowers are yellow, and are produced in quantity for about three weeks in midsummer. The chief value of the plant, however, is the foliage. Succeeds best in a dry situation, 3 to 5 feet\$2.00 \$15.00

VIOLA CORNUTA - Hardy Pansy

This is the very best edging plant for the hardy border or garden; when properly cared for these plants remain in full bloom from May until October. The great secret of their continuous bloom, though, is the fact that they must be sheared several times during the season, so that the flowers do not go to seed. \$7.00 Admiration. Light blue

BULBS FOR FALL PLANTING

In order to complete our service in furnishing hardy material for gardens, we are herewith offering an excellent selection of Imported Dutch Bulbs. Varieties most suitable for forcing are indicated by a star (*). We are doing this upon request of our customers who have been most insistent in their demand that we furnish them with bulbs of the same high quality as the plants we send out. We are able to give this service due to the fact that our secretary and treasurer, Mr. J. J. Grullemans is a son of the owner of the firm of J. J. Grullemans & Sons, Lisse, Holland, who are the second largest bulb growers in the world.

Hyacinths First size bulbs as listed below, \$1.50 per 10; \$12.00 per 100.

BLUSH WHITE

General Vetter. White, shaded blush, changing to pure white when in full bloom. Strong grower with large, well filled spikes.

LIGHT ROSE AND PINK

General De Wet. Lively light pink with a lighter center; large trusses with good sized bells. Fine for forcing or bedding.

Lady Derby. Beautiful, clear rose-pink, with large, compact trusses. Early and fine for forcing and bedding.

LIGHT BLUE AND LILAC

Perle Brilliant. Light blue, tinged lavender; splendid spikes with large, substantial bells. A fine pot Hyacinth and good for bedding.

Queen of the Blues. Clear light porcelain blue; a strong growing variety with large, well formed trusses. One of the best of its color, particularly for bedding.

La Grandesse. Pure white with fine, compact spikes. The best late forcing variety; fine for bedding as well. L'Innocence. This is the most satisfactory all-around pure white. Compact spikes with large bells. Does well indoors and out.

RED AND DEEP ROSE

Gertrude. Deep rose-pink; compact spikes on good stems. A very popular forcing variety, also used for bedding. La Victoire. Shiny carmine-rose, with large, well filled spikes. A splendid bedding variety.

BLUE AND DARK BLUE

rand Maitre. Deep blue with long, compact spikes of large bells, on strong stems. One of the most popular Grand Maitre. blues; fine for pots as well as bedding.

King of the Blues. Dark violet-blue; splendid, large trusses. One of the best known blue Hyacinths. Good for late forcing and bedding.

YELLOW AND ORANGE

City of Haarlem. The finest of the yellows. Well formed trusses of orange-yellow bells. An excellent variety for forcing and bedding.

Feather and Grape Hyacinths

These will grow in any good garden soil, and are excellent for borders that are shaded by trees. They should be planted in large clumps, and be allowed to remain several years undisturbed. They are also well adapted for pot culture and for rockwork.

The Grape Hyacinth is a most interesting flower, perfectly hardy, robust in habit, and admirably suited for the adornment of vases, for which purpose clumps should be planted in the reserve border.

FEATHER HYACINTHS - Muscari Plumosus

Lilium Candidum (Madonna Lily)

Choice Northern Grown. Arrive in August or September.

The favorite Lily of the old-fashioned garden. Produces strong, stiff stems, studded with pure, glistening white flowers, that enliven the perennial flower garden and contrast beautifully with the green shrubbery of June, frequently growing 4½ feet high.

Plant some bulbs during September and October and enjoy a big crop of flowers next June; or put up, store in cold-frame, and force for early winter in the greenhouse or conservatory. Our bulbs of this splendid Lily are grown in northern France, and are of the true thick-petaled variety, which is much superior in habit and flowering qualities to that of the cheap, loose, southern grown bulbs. Our stock from the north of France is hardy and will live in your garden indefinitely.

Our bulbs of this splendid white Lily are the finest that come to America and are much larger than those usually sent out. We supply the best bulbs only from northern France.

Snowdrops

One of the earliest flowers of spring. They can be planted in borders or lawns. Flowers white.

Single\$2.75 \$25.00

Hardy Climbing and Rambler Roses

Climbing Roses require no pruning in the spring beyond the cutting out of very old or dead wood and the shortening of the laterals and long canes to make the growth conform to the space to be covered; but a severe pruning in July, directly after they have finished flowering, is beneficial. Cutting away at that time all old flowering wood will encourage a vigorous growth, which will give an abundance of flowers the following season.

We offer on this page a selection of eight of the best modern Hardy Climbing and Rambler Roses.

heauty. The flowers are of large size, 3 to 4 inches across, of a lovely shade of pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten.

Climbing American Beauty. Its name is somewhat misleading, but it is one of the best climbing Roses. A strong, healthy, vigorous grower, frequently making shoots from 10 to 12 feet long, and good-sized flowers for a climbing Rose that blooms so freely. Color a pleasing rose-pink, of splendid form, good substance.

Dorothy Perkins. Soft shell pink, flowering profusely in large clusters. Very fragrant and lasting. A grand Rose in every way.

Dr. W. Van Fleet. A Rose, which on account of its dainty color and exquisitely shaped buds and flowers appeals to everyone. The long pointed buds are of a rich flesh pink on stems 12 to 18 inches long. Splendid for cutting.

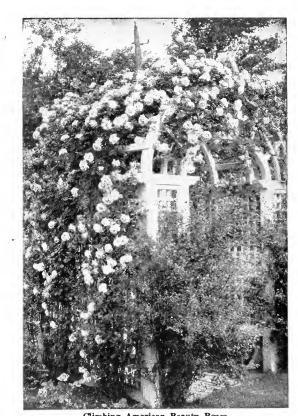

Excelsa. H. W. This sort is also known as "Red Dorothy Perkins," and carries the glossy varnished appearance of foliage shown by that sort, assuring a constant shade all summer wherever used. The flowers of scarlet crimson are borne in large trusses, are very double and large and are produced with the greatest profusion. It is the most valuable sort of its type.

Hiawatha. Its small flowers, deep ruby crimson accentuated by a white eye, are uniquely borne in long trails of 40 to 50 blooms. Very popular for training on fences; not only as a covering for the fence, but because it is really one of the prettiest Roses of its kind.

White Dorothy Perkins. H. W. A pure white climber, identical with Dorothy Perkins except the color. Without doubt the best white climber

Without doubt the best white climber.

Flower of Fairfield. Cl. P. Also called the "Everblooming Crimson Rambler." Combines the beauty of the well known Crimson Rambler with a continuous blooming habit, the new growth bearing large clusters of crimson blooms through the summer continuously. Be sure to include this sort in your selection.

Climbing American Beauty Roses.

Select Hardy Climbing Plants and Vines

AMPELOPSIS VEITCHI - Boston Ivy, or Japan Ivy

The most popular climbing plant for covering brick, stone or wooden walls, trees, etc. becomes established it is of very rapid growth, and clings to the smoothest surface with the tenacity of ivy. The foliage is of a rich olive green during the summer, changing to various shades of bright crimson and scarlet in the fall. In planting Ampelopsis of all kinds, the plants, if still in a dormant condition, should be cut down to within 6 inches of the ground, so that the new growth may cling to the wall or tree from the bottom up. Doz. Extra strong, 2-year-old plants\$4.00 \$30.00

ARISTOLOCHIA SIPHO - Dutchman's Pipe Vine

A vigorous and rapid-growing climber, bearing singular brownish-colored flowers, resembling in shape a pipe. Its flowers, however, are of little value compared to its light green leaves, which are of very large size, and retain their color from early spring to late fall. Perfectly hardy. Each

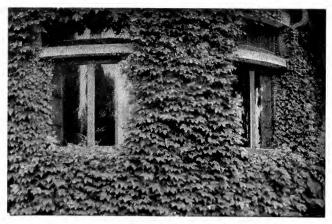

Aristolochia Sipho - Dutchman's Pipe Vine.

POLYGONUM AUBERTI - Silver Lace Vine

A splendid hardy climber of Each Doz. strong, vigorous growth, attaining height of 25 or more feet, producing during summer and fall great foamy sprays of white flowers, and a well established plant during its long period of flowering is a great mass of bloom. Not only does it thrive well in the Eastern and Middle States, but we have seen it in equally good condition in Oregon, Colorado, and California, adapting itself to the

most varied climatic conditions. \$0.40

Ampelopsis Veitchi - Boston Ivv.

BIGNONIA - Trumpet Vine

For covering unsightly places, stumps, rockwork, or wherever a showy flowering vine is desired, the Bignonias will be found very useful. The flowers are large, attractive, and borne profusely when the plants attain a fair size,

Radicans. Dark red, orange throat, free blooming and very hardy\$3.00 \$20.00

HARDY CLEMATIS

Paniculata and other varieties. See page 10.

HEDERA - Ivy

The famous English Ivy with its familiar evergreen, glossy foliage is unfortunately not very hardy in this climate, and requires winter protection where it is exposed to chilly winds on open walls. It can, however, be planted with perfect safety as a ground cover or as an edging to flower beds. Doz. **Helix** (English Ivy)\$0.35

HONEYSUCKLE

Their vining qualities are all that can be desired, but the fragrance of their flowers makes their strongest bid for favor. Halleans. Color an intermingling of white and yellow. Doz. Extremely fragrant and most satisfactory\$2.00 \$15.00

LATHYRUS - Hardy Everlasting Pea (See page 21.)

Hall's Japan Honeysuckle.

VINES-Continued.

PUERARIA - Kudzu Vine

The most rapid growing vine in cultivation, often attaining a growth of 40 feet in a single season. Especially desirable for immediate effect and for dense shade, as its leaves are large.

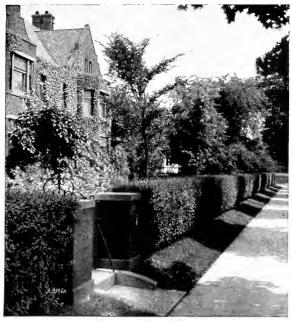

(Jack-and-the-Bean-Stalk). Thunbergiana Small pea-shaped, rosy-purple flowers, heart-shaped leaves. It will grow anywhere. Field-grown plants\$3.00 \$25.00

WISTARIA - Wistaria

Woody vines with tightly clinging habit, for pergolas, arbors, trellises, etc., especially ornamental in early summer when they are resplendent with their large, drooping clusters of fragrant blossoms.

Sinensis (Chinese Wistaria). Bunches of pale lilac, deliciously scented blossoms in great profusion all over the vine. Strong plants\$5.00 \$40.09 -alba. A white-flowered form of the type.

Strong plants 5.00

California Privet.

Spirea Van Houttei.

Wistaria Sinensis.

Hedge Plants

BERBERIS THUNBERGI - Japan Barberry

Where a dwarf deciduous hedge is wanted, nothing equals this beautiful Barberry. Requires but little pruning to keep in shape. The leaves are small, light green, and towards fall assume rich, brilliant colors, the fruit or berries becoming scarlet. Absolutely hardy in all parts of the country. Plant 12 to 15 inches apart.

15.00

Extra strong, 3-year-old plants, 18 to 24 inches \$20.00

CALIFORNIA PRIVET - Ligustrum Ovalifolium

Of all hedge plants this is the most popular, and more of it is planted than all others combined. It is of free growth, and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist. Plant 1-year-old plants 8 inches apart, the 2-year-old plants 10 to 12 inches part.

The plants offered below are strong, heavy, bushy plants of the heights specified, but as these plants, for best results, should be cut back severely when planted we will cut them down to 18 inches in height in order to conserve space in

packing and cost of transportation.

Strong, 1-year-old plants, 24 inches high\$1.25 \$ 8.00 Strong, 2-year-old plants, 30 inches high 1.50

Spirea Van Houttei. The grandest of all the Spireas, and one of the very best of all shrubs. A complete fountain of pure white bloom in May and June 2.00

Berberis Thunbergi-Japan Barberry.

How to Solve a Landscape Problem

Every home owner has at some time a landscape problem, generally of design but often one of construction or maintenance. Few are able to solve all their problems correctly because they lack the time, or training and experience. It used to be customary to fall back upon the advice of a nurseryman or his salesman about what to buy and plant and where to plant, or to rely upon a jobbing gardener or handy man to locate and build walks, drives and other features of residence grounds.

Nurserymen, however, can seldom divide their interest between the production of plants for sale and the question of where to plant them correctly and how to maintain them. Nor is it any longer necessary for them to do so since the services of trained landscape architects are now available to all. The advantage of employing a landscape architect is that one secures a plan or report, or both, covering matters of design and on questions of construction and maintenance has the experience of many others to draw on, since landscape architects are constantly in touch with what is going on and what results are gained on the property of others.

The result of following a landscape plan or report is that the final result can be foreseen whether the work is carried out all at once or not. Also many expensive mistakes can be avoided, such as ordering too many or too few plants. For best results the landscape architect should be called in as early as possible and before the house is started, if possible. Then it is possible to find out if the house is going to be located to the best advantage upon the property, whether the garage and drive are going to be correct in relation to the other features, and last

but not least, whether the flower garden and living lawn are accessible to the living portion of the house. These seem like small problems but are not solved correctly as often as one would think.

One who grows plants to any extent always learns that the correct planting and after-care, or maintenance, is half the battle. This is where the advice of a trained landscape architect is valuable because he can supervise the planting and after-care of plants and thus in many instances insure the success of a piece of landscape work. No matter how fine a plant is sent out by a nurseryman, if it is planted too shallow or too deep, or in shade when it requires full sun, and so on, the result will be failure; but such a failure is not likely to happen if trained advice is followed.

Having employed a landscape architect and secured your plan and list of plants, do not start to shop around for plants. Plants purchased in a department store or upon a price basis are seldom or never satisfactory. Hardy plants go on increasing in productiveness and beauty year after year if properly planted and cared for and the matter of first price is one of the smallest considerations. Your landscape architect knows who sends out the cleanest and strongest plants and his advice should be followed.

Do not be afraid that if you employ a landscape architect you will not have a garden or general layout of your place to suit your notions. If you state your requirements fully and clearly you will be helping the landscape architect to work out your problem and thus going a long way toward solving it successfully.

Planting Table for Plants and Bulbs

PLANTING.—The table below shows the number of plants or bulbs required to fill a circular bed of the dimensions given. In planting begin at outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants or bulbs somewhat closer together in the two outer rows, giving more space between each plant or bulb toward the center of the bed.

| Diameter of bed | 6 in. apart. | 12 in. apart. | 18 in. apart. | 24 in. apart. | 30 in. apart. | Diameter of bed | 6 in. apart. | 12 in. apart. | 18 in. apart. | 24 in. apart. | 30 in. apart. |
|--------------------|-----------------|------------------|------------------|------------------|------------------|--------------------|-----------------|------------------|------------------|------------------|------------------|
| 3 feet | 28 | 7 | | | | 12 feet | 452 | 113 | 50 | 28 | 18 |
| 4 " | 48 | 12 | 6 | | | 13 " | 528 | 132 | 59 | 33 | 22 |
| 5 '' | 80 | 20 | 8 | | 1 | 14 " | 612 | 153 | 68 | 39 | 25 |
| 6 '' | 112 | 28 | 13 | 7 | | 15 " | 704 | 176 | 78 | 44 | 28 |
| 7 | 152 | 38 | 17 | 9 | | 16 " | 804 | 201 | 89 | 50 | 32 |
| 8 | 200 | 50 | 23 | 12 | | 17 " | 904 | 226 | 100 | 57 | 36 |
| 9 | 256 | 64 | 28 | 16 | | 18 " | 1016 | 254 | 113 | 63 | 40 |
| 10 | 320 | 80 | 36 | 20 | 13 | 19 " | 1132 | 283 | 126 | 71 | 46 |
| 11 " | 380 | 95 | 42 | 24 | 16 | 20 " | 1256 | 314 | 139 | 78 | 50 |

A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by 2. For example, an oval 9 feet long by 7 feet wide will require same number of plants as circular bed 8 feet in diameter.

Additional List of Plants

Which have grown large enough for shipment since our catalogue was printed.

Iris Germanica (Choice New Varieties)

Iris Germanica (Choice New Varieties)

Cecil Minturn (Farr, 1922). New. Soft catalyearose. One of Farr's masterpieces. \$5.00 each.

Lent A. Williamson (Williamson, 1918). 42 inches.

Early. Rated in 1922 by the American Iris Society
as the finest Iris in the world. Campanula violet
and velvety royal purple. Brilliant gold beard.

Massive in growth and flower. \$2.00 each.

Lord of June (Yeld, 1911). 40 inches. Midseason.

An exceedingly handsome Iris. One of the very
best. Standards pale lavender-blue; falls rich
deep analine-blue. \$1.50 each.

Mme. Chobaut (Denis, 1916). 36 inches. A cloverscented plicata. Prussian red and pale brown
veins on a pale chalcedony ground, Distinctive
and beautiful. \$2.00 each.

Queen Caterina (Sturt., 1918). 40 inches, Midseason; beautiful uniform orchid self with golden
veining on haft, rich orange beard. \$2.00 each.

gueen Caterina (Sturt., 1918). 40 inches. Midseason; beautiful uniform orchid self with golden veining on haft, rich orange beard. \$2.00 each.

Shekinah (Sturt., 1918). 36 inches. Midseason. A very beautiful pale yellow, much deeper at the throat. Bright lemon beard. The first yellow of pallida growth. \$2.00 each.

Bidens

Dahlicides. Leaves forming a rosette, each stem producing only one flower resembling large Cosmos. \$1.50 per doz.; \$10.00 per 100.

Gypsophila

labatra. Flowers throughout the Summer. \$1.50 per doz.; \$10.00 per 100. Glabatra.

Lupinus

Polyphyllus. Six Hills Sweet Scented. A new strain of this popular hardy perennial, producing each Spring tall, handsome spikes of self- or bi-colored flowers, varying from white to the deepest purple and including in their range pinks and fawn colors together with combinations of pale blue and white, pink and purple, rose and white, etc., rivaling the colors of Snapdragons. But the chief distinctive feature of these Lupines is the delicious seent which they exhale, quite a new and most pleasing feature in this genus. If prevented from seeding, the plants will continue to flower from May to September. \$4.00 per doz.; \$30.00 per 100.

Dianthus Deltoides (Maiden Pink)

rilliant. This variety is a free bloomer and of a much better and brighter color than the old Del-toides; fine for borders and rock garden work. \$1.50 per doz.; \$10.00 per 100. Brilliant.

Clematis

Montana. A vigorous climber, reaching a height of from 15 to 20 feet, producing sweet scented, large, white flowers turning pink with age. Stamens yellow, making a wonderful contrast; flowers in May. 30c each.

Montana rubens. Similar to the above except that the foliage is a bronze color and the flowers are flesh or pale pink, according to soil conditions. 30c each.

each.

Orientalis (Graveolens). Rapid climber reaching a height of 15 feet; yellow flowers 1½ inches across, pubescent on both sides. 25c each.

Scutellaria

Baicalensis coelestina. An Alpine plant, with light blue flowers. 9 to 12 inches. July and August. \$2.50 per doz.; \$15.00 per 100.

Sedum

Aizoon. Clear yellow flowers. 1 foot. July and August. \$1.50 per doz.; \$10.00 per 100.

Ewersi. Broad, glaucous foliage and purplish pink flowers in Summer. 6 inches. \$1.50 per doz.; \$10.00 per 100.

Sarmentosum. Strong spreading habit with yellow flowers. \$1.50 per doz.; \$10.00 per 100.

Glaucum. Forms a close gray-blue carpet with faint pink flowers. \$1.50 per doz.; \$10.00 per 100.

Ternatum. A good rock plant. \$1.50 per doz.; \$10.00 per 100. per 100.

Erigeron

(Summer Flowering Asters)

Coulteri. A very fine free-blooming plant; good cut flower; lavender-pink; 2 to 3 feet. July and August \$1.50 per doz.; \$10.00 per 100.

Centaurea

Dealbata. Distinct bright rose colored flowers. July to September. 18 inches. Is pink form of the Montana. \$1.50 per doz.; \$10.00 per 100.

Saponaria

Ocymoides alba. Dwarf creeping plant covered with white flowers in May and June. Ideal for planting on banks in the sun. \$1.50 per doz.; \$10.00 per 100.

Agrostemma

Valkeri. Similar to Coronaria, but a much better color; will grow anywhere in poor soil; good cut flower. \$1.50 per doz.; \$10.00 per 100.

Primula

Cashmeriana. Flowers early in April, producing pale lilac flower heads; a very fine plant for a shady place. \$1.50 per doz.; \$10.00 per 100.

Mitella

Diphylla (Bishop's Cap). Native. Grows 1 to 2 feet high, producing in early Spring racemes 6 to 8 inches long of delicate white flowers. Pretty for rockeries. \$1.50 per doz.; \$10.00 per 100.

Thalictrum

Minus. A dwarf variety, with greenish yellow flowers. 1 to 2 feet. June and July. \$2.00 per doz.; \$15.00 per 100.

Hemerocallis

Kwanso flore pleno. Large, double flowers of a rich bronze orange. 2 to 3 feet. June to August. \$2.00 per doz.; \$15.00 per 100.

Pentstemon

Earbatus. Huntington's Shell Pink. A new Pentstemon of very fine shell-pink color; very free flowering. Good cut flower. \$2.00 per doz.; \$15.00 per 100.

Scabiosa

Caucasica alba. The white Pincushion Flower. Is very rare and a fine plant; perfectly hardy. \$2.00 per doz.; \$15.00 per 100.

Pennsylvanica. Tall growing Scabiosa with yellow flowers; robust plant; perfectly hardy. \$2.00 per doz.; \$15.00 per 100.

Physostegia

Virginiana grandiflora. A fine improvement on the old variety; tall flowering. 18 to 20 inches. Excellent for cut flowers; fine florist plant. August and September. \$1.50 per doz.; \$10.00 per 100. Virginiana grandiflora alba. The white flowered form of the above; excellent cut flower. \$1.50 per doz.; \$10.00 per 100.

Spirea

Ulmaria flore pleno (Meadow Sweet). Grows about 3 feet high and produces its double, white flowers during June and July. \$2.00 per doz.; \$15.00 per 100.

Matricaria

Golden Ball (Double Yellow Feverfew). Free-flowering plants, producing all season fine double yellow flowers. A fine bedding plant. 18 inches. \$1.25 per doz.; \$3.00 per 100.

Aubrietia (Rock Cress)

urpurea. Pretty dwarf growing plants suitable for the rockery or for the edge of the border, they form masses of silvery green foliage and sheets of nurrile colored flowers in Spring and early Summer. \$2.00 per doz.; \$15.00 per 100. Purpurea.

Aquilegia

Coerulea Mrs. Nichols. This is the improved long-spurred form of the common Aquilegia coerulea. It is a better blue, free bloomer, and much better grower all around. \$2.00 per doz.; \$15.00 per 100.

Delphinium

Blue Butterfly. Dwarf-growing plant good for low borders; color is like that of Belladonna; blooms all Summer. \$1.50 per doz.; \$10.00 per 100.

Iris Tectorum

Tectorum (Evansia). syn., Tomiolopha. A rare and beautiful species from China and Japan, with delicately crested flowers of the most beautiful blue. This is the "Roof Iris" of Japan, where it is grown on the thatched roofs of the cottages. One foot. June. \$4.50 per doz.; \$30.00 per 100.

Pyrethrum

Coseum. Double. Everyone is acquainted with the "Painted Daisy." For the first time in a number of years we are able to offer a limited quantity of double-flowering plants. Shades of white and blush pink: rose and rose-pink; red and deep rose. \$4.50 per doz.; \$35.00 per 100.

LL plants offered in this catalog are strong field-grown roots, especially grown to a size which will give the planter immediate results. There are a few instances where it is impossible to use other than pot grown plants in order to obtain the best results. In a case of that kind we send out either strong two-year or three-year-old pot plants. The prices charged for our stock are based on the above mentioned facts, and therefore should not be compared with prices quoted by firms who sell small one-year field grown or two-and-a-half or three-inch pot plants. Our plants are guaranteed true to name.

We will gladly furnish prospective customers with names of reputable nurserymen and landscape architects who have used our plants and bulbs for many years to their utmost satisfaction.

The Wayside Gardens Company

Largest Growers of Hardy Plants in America
